

ERRATA in Epidemiology, Volume 3, No. 4, July, 1992

Dr. James M. Robins has informed us of the following printing errors that appeared in his article "G-estimation of the effect of prophylaxis therapy for pneumocystis carinii pneumonia on the survival of AIDS patients":

- p. 331, Equation A2.16: overbar was omitted from $\bar{\ell}_{in(t)}$ and $\bar{\ell}_{m-1}$.
- p. 332, Equation A2.18: overbar was omitted from $\bar{\ell}_m$.
- p. 333, "Example: Suppose" should precede Equation A2.21a, from which an overbar was omitted from $\bar{\ell}_m$ on the left side of the equation.
- p. 334, Equation A2.25: overbar was omitted from $\bar{\ell}_m$ on the left side of the equation.
- p. 336, column 2, line 13: delete "then;" beginning of line 14 should read " $\bar{y}_{M,v,G}$."

Dr. Ron Dewar has informed us that Equation 4 which appeared on page 386 in his letter to the editor, "A simple confidence interval for the odds ratio in a two-by-two table with one zero cell," should read:

$$OR_1 = \frac{\pi_L(d + c\pi_L)}{(1 - \pi_L)(b - c\pi_L)}$$

We regret any inconvenience these errors may have caused.
